

WATER E-MOTION

**Every day we allow the world
to benefit from water.**

Our passion never stops growing. Just like our Group.

To be the best you need the **right numbers**.

Such numbers make **our group** one of today's **world leaders** in the production of heating, conditioning and sanitary water distribution components and systems for the residential, industrial and commercial sectors. **A reality constantly expanding**, just like our goals.

GIACOMINI ACADEMY

ACADEMY A STEP TO THE FUTURE

We believe that sharing knowledge is fundamental to progress. For this reason, we created the **Giacomini Academy**, to allow our employees and customers to enrich their knowledge and become fully acquainted with our product range.

CLASSROOM FOR THEORY

PRACTICAL HANDS-ON LESSONS

Internal training for the benefit of the customer. We dedicate a great deal of attention to the expertise and professionalism of our staff, thanks to a continuous education process that includes training courses, workshops and regular meetings designed to enhance technical knowledge. We do this in order to ensure that our customers are provided with the best service by our highly-skilled and qualified staff.

Training for professionals. We want the Giacomini Academy to be a place where ideas can be exchanged between our company and its partners, with a view to creating a source of mutual enrichment that stimulates a drive for continuous improvement. In addition to providing key information on our business activities, our seminars also address the latest market trends and technologies, and the current laws and regulations.

Planning and realization of Giacomini products

Every Giacomini product is planned and manufactured in compliance with the main technical standards and national directives.

- Brass alloys for components in contact with drinking water: lead-free brass, UBA list, CR antizincification
- Gaskets or other organic components in contact with drinking water
- Ecodesign directive (ErP) and energy efficiency labelling
- MID directive for energy consumption metering devices
- Norme tecniche per progettazione e installazione di sistemi radianti a pavimento e soffitto

Technical standards for planning and installation of floor and ceiling radiant systems

For detailed information please refer to the specific technical documentation.
